

Arizona Recycled Energy in Action: Tour and Workshop January 26, 2012 in Phoenix

Solving energy problems and saving money with
combined heat and power, waste heat
recovery, and district energy

You are invited to join us for our upcoming workshop to:

- **Tour** Arizona State University's Combined Heat and Power Plant and the NRG Energy Center Phoenix District Cooling Facility
- **Learn** how recycled energy could save money and save energy for your manufacturing process, large building and/or campus
- **Discuss** what Arizona can do to boost adoption of recycled energy
- **Network** with professionals associated with the energy and money-saving capabilities of recycled energy

The event is **FREE** for the first 20 registrants and \$50 thereafter. (No shows will be billed \$50).
